Adelaide Conducts 2010 Asbestos Assessments

Adelaide recently won and completed five *major* contracts to provide environmental consulting services to the United States Department of Veterans Affairs.

The first VA Medical Center asbestos assessment took place in Wilkes-Barre, Pennsylvania early in 2010 with others following at facilities in Beckley, West Virginia; Richmond and Salem, Virginia; and Fayetteville, North Carolina.

All together Adelaide inspected *over 4-5 million* square feet in area at the VAMCs.
Director of Field Opera-

tions Jason Fullum and his team of Robert See, James Reber, and Dave Seddon toiled with great focus, completing each job within the VA's strict timeframes.

Adelaide is proud to support the work of our Veterans Administration and the U.S. veteran population it serves. We are also actively pursuing other work in the federal arena, having secured a GSA Advantage contract last year.

Adelaide personnel have Asbestos Inspector licenses in numerous states!

Did you know that in 2000 BC, Egyptians used asbestos to make burial shrouds?

That in 56 AD the ancient Romans used asbestos in woven cloth, like we use cotton today?

School AHERA Re-inspections Run throughout Summer

Adelaide is *the* environmental consulting team local schools count on to do their annual AHERA asbestos re-inspections.

Adelaide sent team members out to dozens of public and private grade, junior, and high schools

throughout the state of New York, ensuring that students, teachers and school staff return in September to fully inspected environments. Results are then incorporated into detailed reports that by law are kept on file by the school districts. We also

served as a valuable resource this past spring on the recent EPA changes to lead regs and how they impact local schools.

See www.adelaidellc.com for further information.

Adelaide Environmental Health Associates, Inc.

Welcome Our New Employees

Robert See, Michael Jaso, and Dave Seddon joined Adelaide's team this summer and have already proved to be huge assets to the firm. Both Robert and Dave bring extensive knowledge and experience in a wide variety of environmental health contexts. Michael is a recent graduate of the University of New Hampshire and is learning quickly.

Adelaide is also pleased to announce that Valerie S. Vick has been appointed Director of Business Development. Valerie, a licensed attorney and former litigator, spent the last eleven years as Managing Editor of an international academic journal. She brings strong writing skills, a meticulous eye for detail and intense focus to Adelaide's marketing and proposal writing efforts.

(Left to Right) Back Row: Jason Fullum, Jimmy Reber, Robert See, Mike Jaso. Front Row: Dave Seddon, Mike Buchinsky and Kerry Garratt.

Welcome to All!

King Charlemagne actually ordered his tablecloths be woven with asbestos fibers. When he wanted to clean them, he merely threw them into the fire.

Adelaide Continues Work for NYS OGS

Adelaide continues to be the environmental consulting firm New York State's Office of General Services calls on for bio-hazardous and hazardous materials testing and project/air monitoring at locations throughout the state of New York.

Under the *fourth consecutive* term contract with NYS OGS, Adelaide provides investiga-

tive services, assistance with abatement design and project monitoring services for asbestos, lead, PCBs, mold, radon and other toxic chemicals.

Adelaide currently executes over 200 work orders per year on this contract in a variety of buildings statewide, including correctional facilities, health-care facilities, public venues and historically significant

architecture, such as the Capitol building in Albany.

Adelaide brings over 27 years of experience to the table on this and all projects we undertake.
